PROJECTS HIGHLIGHTS :-

CMS (Campaign Management System) [6D Technologies]

2019 - 2022

Role: UI development in React JS [Dashboard]

Project Description :-

A (CMS) is a software solution designed to handle the various components of a marketing campaign, provides a user friendly dashboard that allows business/marketing leaders to see vital data and to identify the key outcomes in various marketing efforts. Worked for Airtel , and other Dubai , Africa ,etc telecom provider companies.

Responsibilities :-

- Created various small Games on React and HTML , CSS , JS for the Gamification web & mobile app like Spin wheel , Roll dice , Guessing Game, etc.
- Once, coded for the dynamic form where user can simply drag and drop the input fields so to make it look like a form with label and other stuffs and later after filling up the data , on submit the object of the form data is created dynamically and send to backend
- Sometimes had to have a client discussion to gather more information or requirement for the product that need to be delivered
- once made the UX design for a particular requirement in Figma in the absence of the designer just to showcase to my manager.
- Created and used various filters , pagination techniques and tools that would help the user to get full control over the reports they want to search for or it can be user itself.
- Did input fields validation with regex and worked with Text/Page animation plugins, toasters, etc.

Achievements :-

Got congratulation certificate from my manager for completing the project on time in mail.

Static / Dynamic webpages for Public Domain websites [Appiness Pvt. Ltd.]

2017 – 2019

Role: UI developer

DASHBOARD PROJECT (4 projects):-

[ANGULAR 7 & REACT JS]

These project are mainly an admin panel from where the admin and other members who have the access can manage the database or the website content itself.

PORTAL WEB PROJECT (1 projects):-

[REACT JS]

These project are mainly an admin panel from where the admin and other members who have the access can manage the database or the website content itself. It is specially designed website that brings information from diverse sources, like emails, online forums and search engines, together in a uniform way. ... Variants of portals include internet and intranet "dashboards" for executives and managers.

INVESTMENT PROJECT (2 projects): -

[ANGULAR 2+ & REACT JS]

These project is been done in ANGULAR & REACT JS solely , which basically is for the investor who are looking forward for the investment seeing various different projects with the brief info.

HOSPITAL PROJECTS (7 projects) :-

[HTML , CSS & JS]

Informational website , which provide the patient or any other person with the accurate and brief knowledge in every aspects of the terminology related to the medical field.
